## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 17-25, 33-41 and 49-57, drawn to an automated library having a controller for activating an accessor in place of another accessor having restricted movement, classified in class 700, subclass 214.
  - II. Claims 10-16, 26-32, 42-48 and 58-64, drawn to an automated library having a work queue of commands for an accessor where a limit is determined on said commands and prevents execution of limited commands upon detection of restricted movement, classified in class 700, subclass 214.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an automated library having a controller for activating an accessor in place of another accessor having restricted movement where accessors do not have a work queue. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3651

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gene O. Crawford whose telephone number is 703/305-9733. The examiner can normally be reached on Monday thru Thursday.
